

# The University of Oklahoma Physics Undergraduate Summer Research Program

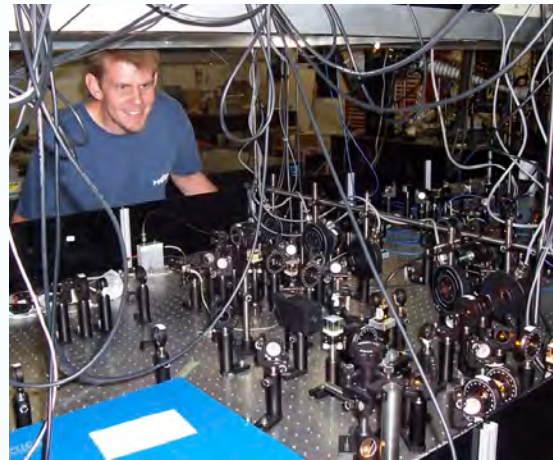

Opportunities are available for students with interests in Physics or Astronomy to participate in an NSF sponsored REU (Research Experience for Undergraduates) at the University of Oklahoma. Students will be involved with ongoing research, working with faculty from OU and students from around the country, and participating in career preparation seminars.

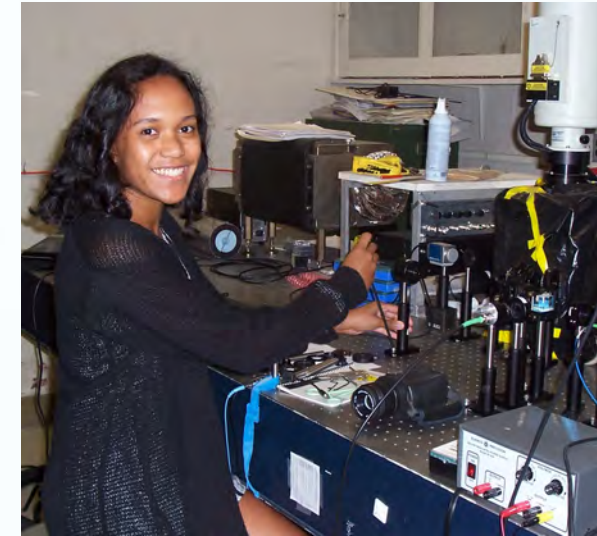

## REU Research offered in:

- **Astronomy and Astrophysics**
- **Atomic, Molecular, & Chemical Physics**
- **High Energy Particle Physics**
- **Condensed Matter Physics**
- **Theoretical and Experimental Research Programs**

The program runs from **May 29–July 31, 2018**  
A stipend of \$4500 plus housing and travel will be provided.

Research facilities include Laser Cooling, Precision Measurement Labs, Atom Interferometry, STM Lab, Molecular Beam Epitaxy Facility, Particle Detector Development Lab and Clean Room, High Magnetic Field Lab, and High Performance Computing Facilities

Applications received by **February 12, 2018** will be considered in full. Late applications may be considered as space permits.
