COVID-19 Prevention

Currently there is **NO** vaccine to prevent COVID-19.

The best way to prevent illness is to avoid being exposed to this virus.

Everyone has a role to play in getting ready and staying healthy.

COVID-19 Precautions

Clean your hands often with soap and water and/or hand sanitizer.

Avoid touching your face with unwashed hands.

Avoid close contact, putting distance between yourself and others.

Stay home if you are sick, except to get medical care.

Cover coughs and sneezes.

Clean and sanitize your workspace before and after you work.

COVID-19 Persistence

Air >3 hours.

Cardboard 2-4 hours.

Copper 4 hours.

Plastic 2-3 days.

Steel 2-3 days.

COVID-19 Cleaning

COVID-19 (novel coronavirus 2019) is a respiratory illness that primarily spreads through the air and through personal contact with surfaces and infected people. COVID-19 is an enveloped virus, meaning it is easily compromised by proper cleaning and sanitization. Disinfect frequently touched objects and surfaces. For example: phone, desk, table, keyboard, mouse, control remote, doorknobs, etc.

CLEAN

Remove visible soil and dirt from surfaces using soap and water.

SANITIZE

Apply an EPA registered disinfectant to kill COVID-19.

WAIT

For effective sanitizing, wait the proper contact time as indicated on the product label.

Common cleaners include: Clorox Disinfecting Wipes, Lysol Brand Bleach Multi Purpose Cleaner, Purell Multi Surface Disinfectant.
